PHOTOSENSITIVE SEIZURES

SEIZURE WARNING — Please Read Prior to Playing

A very small percentage of individuals may experience seizures when exposed to certain light patterns, flashing lights, or flashing images. Children and teenagers are more susceptible to seizure than adults, but even those with no history of seizure or epilepsy could experience them while playing or watching video games.

Symptoms of seizures include: lightheadedness, altered vision, jerking or shaking of the extremities, loss of awareness, confusion, twitching, or full convulsions. Convulsions can lead to other injuries by causing an individual to fall off of a chair and/or strike objects nearby.

If you or anyone in your family has an epileptic condition or history of seizures, consult your physician prior to playing this game—you could have an undiagnosed condition. If you experience any of the aforementioned symptoms of a seizure while playing, STOP PLAYING AND CONSULT YOUR DOCTOR IMMEDIATELY. Parents should ensure their children are not experiencing symptoms.

In order to reduce the risk of photosensitive epileptic seizures, you should play NC Interactive games in a well-lit room while you are alert and awake. Avoid poorly lit rooms and playing when fatigued.

INSTALLATION

SYSTEM REQUIREMENTS

Minimum Specifications
Microsoft Windows XP SP2
2.8GHz CPU or equivalent
1GB RAM
ATI x700 or NVIDIA 5900 Ultra with 128MB RAM or higher
15GB hard disk space
DVD-ROM drive
Direct X 9.0c (6/2008 update)
Sound device
Broadband Internet connection

Recommended Specifications
Microsoft Windows XP SP2 / Vista
Dual Core CPU 2.0GHz or equivalent
2GB RAM
ATI x800 or NVIDIA 6800 with 256MB RAM or higher
15GB hard disk space
DVD-ROM drive
Direct X 9.0c (6/2008 update)
Sound device
Broadband Internet connection

INSTALLING THE GAME

Insert Disc One into your DVD drive or double-click the downloaded installation file. Follow all instructions in the setup wizard. As part of installation, the NCsoft® Launcher is also installed. It is required to run Aion.
CREATING YOUR ACCOUNT

To play NCsoft games or make purchases from the NCsoft store, you must first create an NCsoft Master Account. Visit www.aiononline.com/account to get started. If you need additional help, visit www.aiononline.com/help.

Create an NCsoft Master Account

1. Go to www.aiononline.com/account and click the Create Account button to register for a new NCsoft Master Account.
2. Follow the remaining on-screen instructions to choose your NCsoft account name and password. Make sure that you enter valid and correct information, and that you remember your NCsoft Master Account details, as this account will be used to manage your payment information. (If you already have an NCsoft Master Account, you do not need to create another one. You can use the one you already have.)

Now, you must create an Aion game account on your NCsoft Master Account to log in to the game.

Create an Aion Game Account

1. Log In: Visit www.aiononline.com/account and log in to your NCsoft Master Account.
2. Use Your Serial Code: In the NCsoft Account Management page, click Use a Serial Code. Enter your Aion serial code in the space provided, click Continue, and follow the remaining on-screen instructions.
3. Select Payment: Choose your preferred payment method to activate your game account. You need a valid credit card, debit card, PayPal® account, or a prepaid game time card to activate your account. Other payment options may also be available. These options, and details of each payment method, will be listed when you select the payment method.
4. Account Activation Notification: You will receive an e-mail once your game account activation is processed.

Important: Save the “Game Account Activated!” e-mail sent to you after the initial activation of your game account.

This account activation e-mail contains a very important piece of information used to verify account ownership. You may need it to get help with your account later. This information is provided only in the e-mail sent after the original activation of your game account. It cannot be resent.

Log In to the Game: After you receive the “Game Account Activated!” e-mail, you are ready to log in to the game and begin playing.

Getting Started

1. Double-click the Aion icon on your desktop or click the icon in your computer’s Start menu to open the NCsoft Launcher.
2. Click Aion in the list to the left in the launcher and choose Play Now to launch the game. A download may be required to update your game to the latest version.

CHARACTER CREATION

Log In: Enter your game account name and password to log in to Aion. Once you have accepted the User Agreement, select a server to get started making your first character.

Character Selection Screen: Each server has eight character slots available. Click the Create button at the bottom of the screen to begin.

Choose Your Side: You first choose your side in the ongoing war of Atreia by selecting your race: Elyos or Asmodian. Click Next.

Select a Starting Class: Choose from one of four classes when creating your character: Warrior, Scout, Mage, or Priest. As your character progresses, you will be able to further refine your character’s class and skills.

- **Warriors** specialize in close combat, utilizing their great physical strength and prowess. They have a wide range of dazzling battle skills other classes cannot perform. Warriors are relatively easy to play.
- **Scouts** provide the best variety of play styles among the basic classes. They benefit from great agility and can make speedy attacks, though how well they perform depends on the skill of the player. Scouts are extremely versatile.
- **Mages** rely on their mastery of magic to deal large amounts of damage at long range. They are comparatively weak at close combat, and it is important for them to learn how to divert and evade the enemy.
- **Priests** specialize in healing magic and can use long-range spells to help allies and to hinder the enemy. While Priests are more than capable of engaging in melee combat, their strength lies in healing and using protection spells to aid allies and themselves in battle.

When you have chosen your class, click Next to continue.
**Customize Your Character:** The Create Character screen provides a number of options to customize the look of your character down to the smallest detail.

**Character Name:** Enter your desired character name in the field provided. Character names must be between 3 to 16 letters in length and contain no numbers or special characters. Only the first letter can be capitalized. Click Check Name to verify that another character has not already claimed a name.

**Customize Character Appearance:** Click the Customize Face button on the left to choose a hairstyle, customize the appearance of your character’s face, and more. Use the drop-down menus and sliders to change each desired detail of your character’s face and hair.

- Click the Body button on the left to select a body frame. Use the drop-down menus and sliders to change details of your character’s body such as head size, chest, and waist.
- Click the Random button on the bottom right of the screen to move the sliders of the current tab randomly. Click Reset to return the sliders to their default location for the selected face or body.

Beneath your character, you can select one of three buttons to display how your character will look without armor equipped, with beginner armor equipped, and with high-end armor equipped. These buttons show a preview only and do not change the look of your character.

**Finish Creating:** Once you are happy with your character’s look, click the Create button to finish character creation. You are now ready to begin your adventures in Atreia!

**INTERFACE**

When you log in to Aion, you see the default game interface on the bottom of the screen. (You can move the interface to the top of the screen by opening the Options window and selecting that UI style.)

1. **Character Portrait:** Click your portrait to target yourself.
2. **HP, MP, and DP Bars:** These bars display your health points, mana points, and divine points. DP (divine points) are earned with every creature you kill after you choose your class specialization at level 10. You spend these points by using DP skills specific to a class and faction.
3. **Experience Bar:** The bar on the bottom of the screen displays how much experience you have earned in your current level. Monsters that you kill and completing quests grant experience toward your next level.
4. **Lock Toolbar Button:** Click the padlock to lock the skills and buttons currently on the toolbar.
5. **Menu:** View your inventory, skills, quests, and more through the game menu. You can also use the game menu to open a private store to sell your wares to your fellow adventurers.
6. **Influence Ratio:** Influence ratio is related to the number of fortresses controlled by a race. Use this window to view the tax rates for all items purchased through vendors for a given race (Elyos or Asmodian) across the server.
7. **Toggle Flight**: Click this button to switch between flying and landing. The window also displays available flight time, cooldown, and keyboard commands for soaring through the skies.

8. **Compass and Minimap**: View your current location and nearby points of interest. The green dot with a yellow arrow indicates your position, and other dots on the map show nonplayer characters (NPCs), enemies, and other players. White dots mark players of your faction and neutral creatures. Enemies are depicted in red. Your group members are represented by blue diamonds. Arrows indicate NPCs with a quest or campaign. Click the button on the right of the minimap to open a full map.

9. **Chat Window**: The Chat window shows communication from the game and other players. Click the button on the left side of the window to open the Chat Preferences menu. You can add and remove chat tabs, lock the window, choose a font size, and open the Emotes window in this menu.

10. **Chat Tabs**: The chat tabs show all game and player messages, all chat except combat messages, messages related to combat only, and the communication between your group members only. To select a tab, click it. Use the Chat Preferences menu to open more tabs and to customize the messages you see in the Chat window.

---

**BASIC MOVEMENT**

**Ground Movement**: You can move your character with either the keyboard or the mouse.

- Use the W, A, S, D or the arrow keys to move forward and back, or to spin your character to the left or right.
- To move using the mouse, unselect **Disable click-to-move** in the Game Options pane of the Options window (found in the System Menu). Then you can click the ground with the left mouse button to move to that location.

**Camera Position**: Use the right mouse button to move the camera to adjust your view of your character's surroundings.

**Flight**: At level 10, your character becomes a Daeva once you have completed your Ascension. Your character then gains the ability to fly. If your character jumps off an elevated point by using the spacebar, you can double tap the spacebar to gently glide to the ground. If the area your character is in allows flight, take to the skies with the Page Up key. You can also click the Toggle Flight button in the game interface to spread your character's wings. Press the R key to rise in the air, and the F key to fall. The Toggle Flight window displays other flight commands, as well as the remaining time your character can fly.
COMBAT

Attacking: When your character has an enemy targeted, click the **Attack** button on the toolbar or double-click your left mouse button on the opponent to initiate combat. Click the skills in your toolbar (or corresponding number key) or double-click the icon of a skill in the **Skills** window to unleash your character’s abilities.

If your character moves while in combat, green arrows appear on the screen near your character. The key you press grants your character a specific attribute boost:

- **Forward**: Increases Attack, lowers Physical Defense and Elemental Resists
- **Backward**: Increases Block and Parry, lowers Attack
- **Left or Right**: Increases Evasion and lowers Physical Attack

These moves are especially useful when fighting other players. They give your character an edge in battle.

Chain Attacks: A flashing icon that appears in the middle of the screen after you use a skill indicates that your character has a chance to land a chain attack. For example, one skill may open up the use of another skill, deal additional damage, add an effect (such as sleep or poison), or change the state of your enemy (such as a knockback).

Open the **Skills** window by pressing **K** and click the **Chains** button to see your character’s available chain attacks.

Looting: Don’t forget to pick up all items from a defeated enemy’s corpse! Double-click or right-click the fallen target to loot items, or click the **Take All** button to loot all items.

QUESTS

During your travels, your character will meet many allies who need help. Icons appear above the heads of (NPCs) to show you if they are offering your character a quest. Right-click or double-click on the NPC to strike up a conversation.

- A **single blue arrow** shows that the NPC has a regular quest for your character.
- A **double blue arrow** means your character has completed a regular quest the NPC gave your character, but your character still has more tasks to complete.
- A **blue sun** indicates your character has fully completed the regular quest the NPC gave your character and currently has no additional quests to offer.

NPCs with a campaign quest for your character are marked with a **single golden arrow**.

- A **double golden arrow** shows that your character still has remaining quests in a campaign quest to finish.

A **golden sun** indicates that your character has fully completed the campaign quest for that NPC.
The World of Aion

The shattered world of Atreia is inhabited by two playable character races—Elyos and Asmodians—and their common enemy, the Balaur.

The Asmodians

The Asmodians are a brave and hardy people. Their skin is pale or dusky, and their eyes have adapted to low light by gaining an otherworldly glow that is most pronounced during combat.

Asmodians are generous and fiercely loyal to their own, but they do not think twice before fighting ferociously against outsiders. Ascended Asmodian Daeva is blessed with strength and the ability to fly, and their feathered wings are dark in color.

Asmodians live in the murky upper half of Atreia, the world of Aion, known as Asmodae. Their capital city is Pandaemonium.
THE ELYOS

The Elyos are a beautiful and radiant people. Elyos are comforting, warm, and friendly, but against foes, they are not kindly or benevolent. Elyos believe they are blessed, but their splendor has also led them to become arrogant. The ascended forms of Elyos Daevas have stunning, angelic wings, and their immense strength belies their graceful appearance.

The Elyos occupy the lower half of Atreia, a light-filled land known as Elysea. Their capital city is Sanctum.
The term “Balaur” invokes images of terror and fear in the hearts of humans in both halves of Atreia. A mighty and highly intelligent race created by the god, Aion, to care for and rule the planet’s population, the Balaur quickly became fixated with power and domination. Their aggression eventually led Aion to create the twelve Empyrean Lords to safeguard the planet and its people.

After a long and vicious war against the Empyrean Lords, the Balaur were involved in the destruction of the Tower of Eternity during a meeting intended for peace. The Tower’s destruction cast the Balaur into the Abyss, an unstable rift between the two shattered halves of Atreia where the center of the Tower used to be.

Recently, however, the Balaur have managed to escape from their prison, and now they threaten this fragile world with their fury once again.

LIMITED WARRANTY
The following warranty and support information applies only to customers in the United States and Canada, and only to original consumer purchasers of products covered by this warranty.

NC Interactive, Inc. warrants to the original purchaser of the enclosed product (the “Product”) that the media containing the Product will be free from defects in material and workmanship for a period of ninety (90) days from the date of purchase (the “Warranty Period”). NC Interactive’s entire liability and your exclusive remedy under this limited warranty shall be, at NC Interactive’s option, repair or replacement, without charge, of all or the affected portion of any Product that proves to be defective in material or workmanship during the Warranty Period.

EXCLUSIONS FROM WARRANTY
This warranty applies only to defects in factory materials and factory workmanship. Any condition caused by abuse, unreasonable use, mistreatment, neglect, accident, improper operation, destruction, or alteration is not a defect covered by this warranty. Parts and materials subject to wear and tear in normal usage are not covered by this warranty.

LIMITATIONS
This warranty is in lieu of all other warranties and no other representations or claims of any nature shall be binding on, or obligate NC Interactive. Other than the warranties set forth above (which are limited to the ninety (90) day period described above), NC Interactive products are provided “as is” without express or implied warranties of any kind, including, without limitation, warranties of merchantability and fitness for a particular purpose. NC Interactive does not warrant that the products will be error free or will operate without interruption. In no event will NC Interactive be liable for any special, incidental, or consequential damages resulting from possession, use, or malfunction of NC Interactive products. Some states do not allow limitations as to how long an implied warranty lasts and/or exclusions or limitations of incidental or consequential damages. So the above limitations and/or exclusions of liability may not apply to you. This warranty gives you specific rights, and you may also have other rights that vary from state to state. Neither NC Interactive nor your retail dealer has any responsibility for any incidental or consequential damages relating to your use of the product, including, without limitation, any damages for loss of data or loss of profit, or for any incidental expenses, loss of time, or inconvenience. As some states do not allow the exclusion or limitation of incidental or consequential damage, the foregoing limitation or exclusion may not apply to you.

HOW TO OBTAIN WARRANTY SERVICE
To obtain warranty service, please send the defective Product, together with a copy of your original sales receipt, your return address, name, telephone...
number (should contact be necessary), and a brief note describing the defect to NC Interactive at the following address: 6801 N. Capital of Texas Hwy, Bldg. 1, Ste. 102, Austin, TX 78731-1780. The defective product must be post marked within ninety (90) days from the date of purchase. Proof of purchase in the form of a dated receipt must be included to obtain warranty service. The shipping costs for sending the defective product to NC Interactive is the sole responsibility of the Customer. NC Interactive will not be liable for any damage that occurs during shipping.

If you have warranty questions, you can also contact our Customer Support department via email at: support@plaync.com.

CUSTOMER SUPPORT
For customer support, account support, and technical support questions, please visit the support section of the Aion website at www.aiononline.com/help.
